

**Dorlin Gold project, French Guiana**  
**Drilling results**

Mineralized intersection from the last drill holes of the 2018 drill program are reported below. The results for 25 drill holes totaling 2,504.51 meters are presented in Table 1 and their location is indicated in Table 2 and Figure 1.

Table 1: Gold intersection composites from Nivré South, West and East zones  
(lower cut-off at 0.4 g/t Au - only intersections longer than 1.0 meter and grading above 1.0 g/t gold are included)

Zone	Hole ID	From (m)	To (m)	Downhole Width (m)	True Width (m)	Au g/t
